# Looking to GROW your Business?

*Let us help!*

According to the National Restaurant Association,  
*more than 90% of waiter-service restaurants prepare food to go!*

Many chains are making it easier for takeout patrons by accepting online orders (and orders phoned, faxed, or e-mailed). Some also offer local delivery and curbside pickup.

*Pickup can account for an estimated 10-12% of sales at full-service restaurants!*

The most convenient chains have created separate entrances or parking spaces for pickup customers and have spotters who watch for your car so that they can deliver your order as soon as you pull up.

*Your competitors are doing it, so why aren't you?*
