Great Flavor for Summer Specials

About Koppert Cress

Koppert Cress BV started on July 1, 2002 in the Netherlands, after being purchased by Rob Baan. In October, 2006, we proudly launched our first franchise in the United States. Our 30,000 sq ft greenhouse is located in Cutchogue, New York. This strategically positioned location guarantees fresh supply across the United States. Our state-of-the-art greenhouse facilities reflects the demand for fresh, clean and outstanding flavored Micro-Greens, Micro-Vegetables and Specialties.

We never stop improving our techniques in search for the perfection of client relationships, new products, packaging and freshness. We aim at the chef who wants year-round supply of clean, fresh, HACCP certified, rare ingredients in order to create his or her signature dish. We challenge restaurateurs not only to use our product as decoration, but as unique and flavorful condiments.
